

HealthMatters

One Member's Story

"I was getting mixed opinions from different doctors about a medical condition. I didn't know whose advice to follow so I decided to call Best Doctors. I received a report from Best Doctors that recommended three different tests that gave me a much better idea of what needs to be done. The information I have from Best Doctors gave me the information I needed to get to the bottom of my problem and start treating my condition. I am fortunate that I have access to Best Doctors and I have already recommended the service to someone else."

Marie, Best Doctors member
